

## COVER LETTER

Dear Hiring Manager,

I am excited to apply for the Software Engineer role at Myntra, as advertised. With a strong foundation in Express.js, Node.js, and JavaScript, coupled with my proficiency as a MERN stack developer, I am confident in my ability to contribute effectively to your team. I also have experience in frontend development using React.js and Tailwind CSS, allowing me to build seamless and visually appealing web applications.

One of my most notable accomplishments was winning the Mind Spark Hackathon, sponsored by Tata Power and organized by the College of Engineering Pune (COEP). Despite my background as a MERN stack developer, I embraced the challenge of learning game development specifically for this competition. This experience not only honed my technical abilities but also demonstrated my adaptability and eagerness to tackle new challenges.

Another achievement I am proud of is winning the Winjit Tech Fest Hackathon. This intense two-hour competition required us to develop a web application capable of interacting with PDF documents. Our team efficiently created a functional and innovative solution within the tight timeframe, showcasing our problem-solving skills and technical expertise.

In addition to my hackathon successes, I have a diverse portfolio of projects on GitHub that demonstrate my skills and versatility in backend and full-stack development. I would be thrilled to bring this experience and passion for innovation to Myntra.

I am eager to discuss how my background, skills, and achievements align with the goals of your team. Please feel free to contact me at +917774860123 or via email at chavhanpranay48@gmail.com. I look forward to the opportunity to connect.

Yours Faithfully  
Pranay Chavhan
